

## Life Cycle Assessment Internship

Ecomatters is looking for an intern that wants to gain experience in life cycle assessment! Doing an internship at Ecomatters will enable you to develop relevant experience in the field of sustainability and to provide the opportunity to test your knowledge and skills.

### About Ecomatters

Ecomatters is a sustainability consultancy which offers services based on life cycle thinking and focuses on sustainability throughout the value chain. We perform quantitative analyses evaluating the social, economic and/or environmental aspects of services and products and assist in the preparation of product claims. Furthermore, we support organisations in developing their sustainability strategy and setting concrete sustainability goals. Besides working with our clients, we also push ourselves to have our own impact on the future by initiating our own projects on energy efficiency and carbon neutrality.

### About the internship

At Ecomatters, we are not only interested in supporting organisations with their sustainability topics, we also like to focus on our own impact. Therefore, we want to gain more insight in the environmental impact of consultancy as a service. The aim of the internship will be to perform a full Life Cycle Assessment (LCA) and carbon footprint study for Ecomatters' consultancy service. In the future, this study and the results could be used as an example project and report for our clients.

### Do you fit this profile?

You are:

- ✓ Currently enrolled in a MSc degree in natural sciences, sustainability, chemistry, environmental assessment, technology/ engineering/modeling, economics or similar.
- ✓ Available for a full-time internship of 3 or 4 months.
- ✓ Able to work (at least partially) from our office in Utrecht, the Netherlands.
- ✓ Experienced or interested in the field of Life Cycle Assessment (LCA) and quantitative environmental assessment.
- ✓ Self-sufficient, proactive and comfortable working in a dynamic environment and in a small team.
- ✓ Fluent in English and have enough knowledge of Dutch to feel comfortable in a Dutch environment.

An internship at Ecomatters will give you relevant skills and working experience, as well as an exciting environment in the beautiful canal city Utrecht. An internship compensation will be available. The internship will be full-time (40 hours per week) and can start from February or March 2023, the exact starting date is open for discussion. We would prefer a working-internship over a research focussed internship, but this is also open for discussion.

### The application process

For more information about Ecomatters or the internship, please check out our website: [www.ecomatters.nl](http://www.ecomatters.nl).
